

Captain onboarding leak & overnight airport supply

For the Head of Supply: ~180 extra approved captains a month from two photo-quality fixes, and why overnight airport supply is an economics problem, not a hiring push.

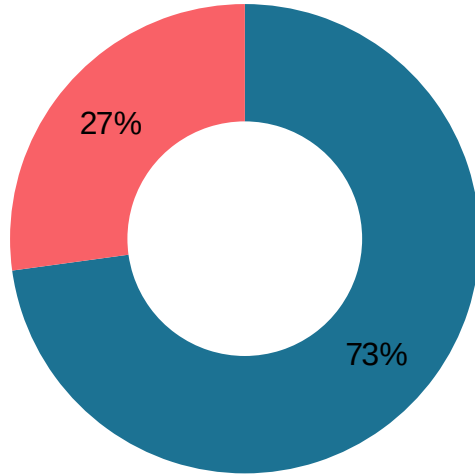

Ramanathan K R

10 September 2026 · extract 30 Jun 2026, 23:59 IST · 25k captains

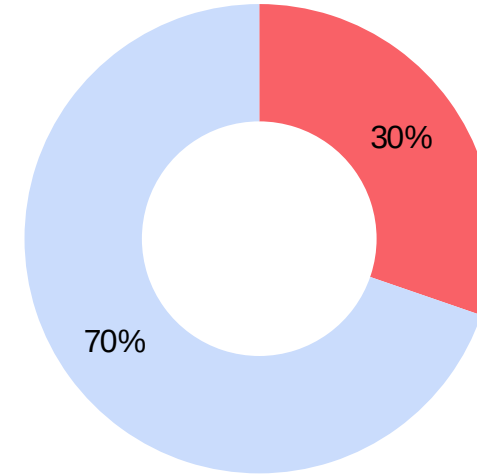

Two photo fixes recover ~180 approved captains a month

Split of the ~180 (disjoint C1a + C1b)

■ C1a RC ~134 ■ C1b Insurance ~50

RC loss: only the capture slice is C1a

■ Capture-only 1,637 ■ Other RC 3,768

98.7%

of mature approved take a first trip
(3,895 / 3,946)

~134/mo

C1a RC 10-day grace · 60% show-up
assumed

~50/mo

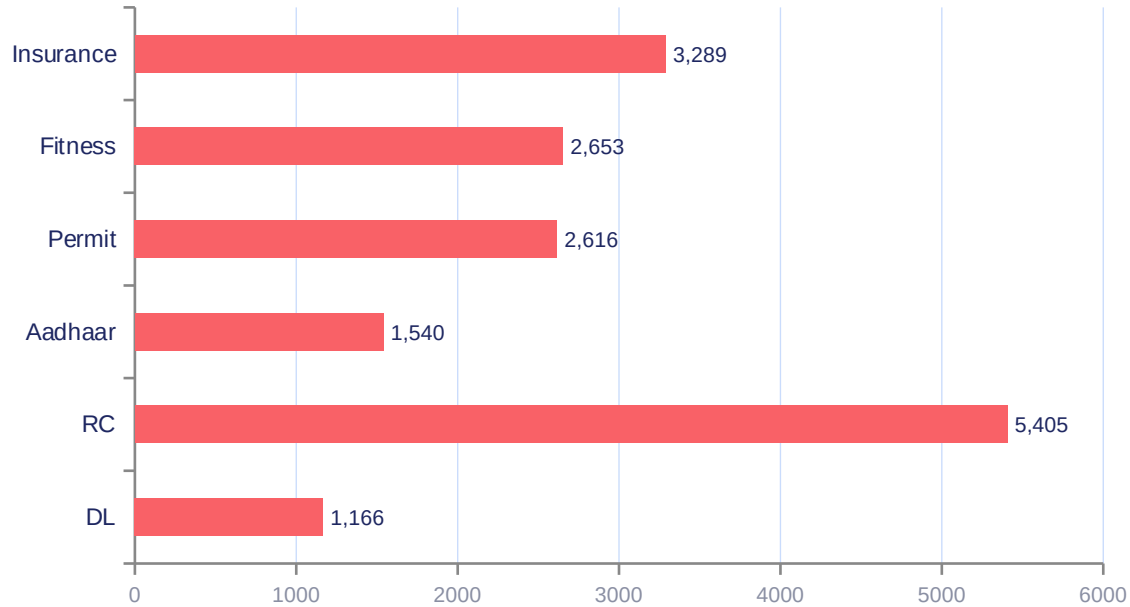

C1b Insurance camera UX · no deferral

~180

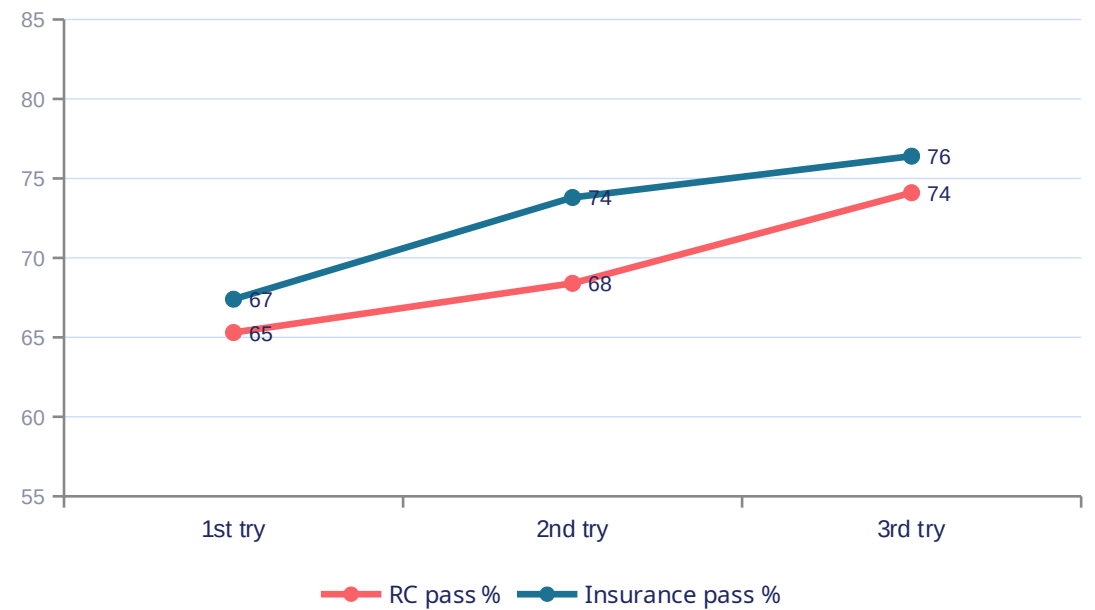

bank these two only — do not add fos
128–256

RC and Insurance fail as photographs, not documents

Volume lost by stage (mature n events)

Retry pass rates rise — capture, not eligibility

1,637 RC + 411 Insurance = capture-only (blur / OCR / illegible). DL 1,166 is 100% uploaded-fail and cannot be deferred. Aadhaar / Permit / Fitness are mostly never-upload or eligibility — a camera does not fix those.

C1b ships this week. C1a waits on Legal. Same camera is not extra 180.

C1a RC**Provisional RC · 10-day in-person**

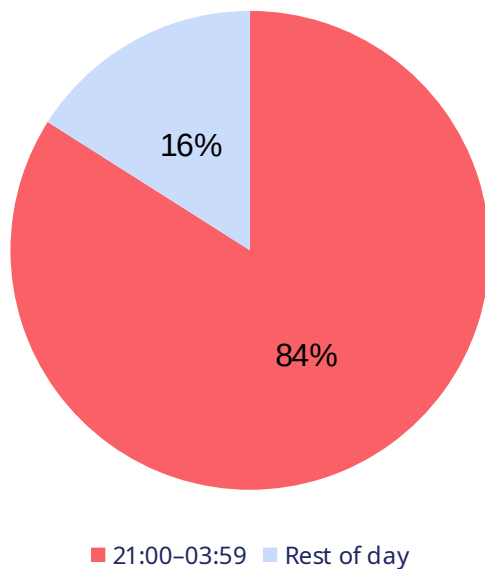

Who	1,637 capture-only · ~300/mo flow
Why defer	Vehicle ID, not passenger liability
Maths	$\sim 300 \times 60\% \text{ show-up} \times 74\% \text{ pass} \approx 134$
Risk	Show-up unobserved. Legal must treat as activation.
Watch	If remaining docs bind $\rightarrow$ ~36/month

C1b INS**Guided capture UX · no deferral**

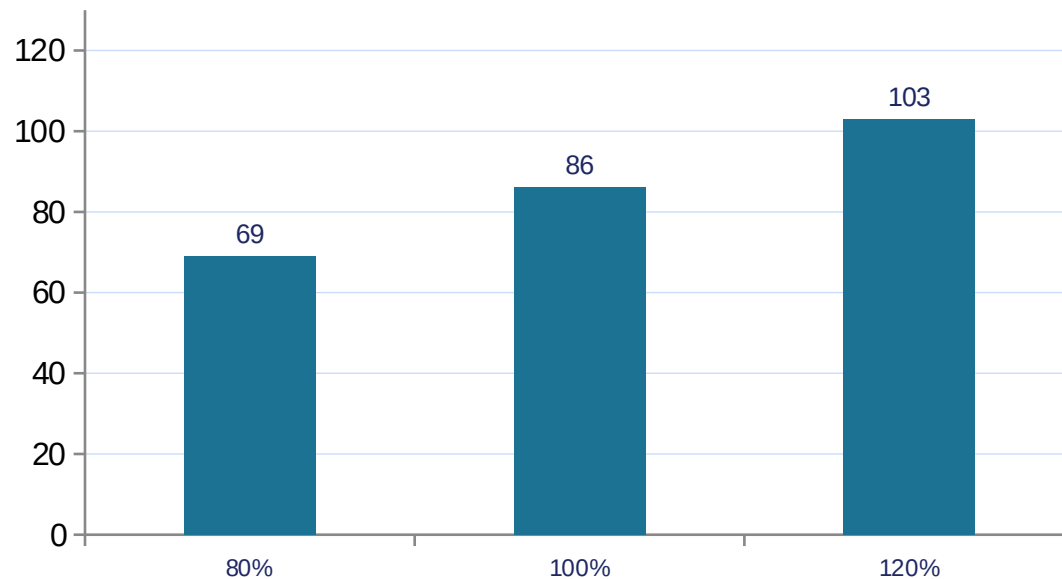

Who	411 capture-only · must clear before a ride
Why not	Liability document — cannot defer
Maths	$67 \rightarrow 76\% \text{ pass} \times 91\% \text{ approved-if-cleared}$
Central	~46–52 extra approved / month
Needs	Engineering only — ship this week

Do not hire the catchment. Price the deadhead.

When the pain sits (unfulfilled volume)

ARA sample cost at ₹35.4 / eligible leg

40%

unfulfilled at terminals vs ~3% elsewhere

~13 vs ~37

captains online nights vs rest of day

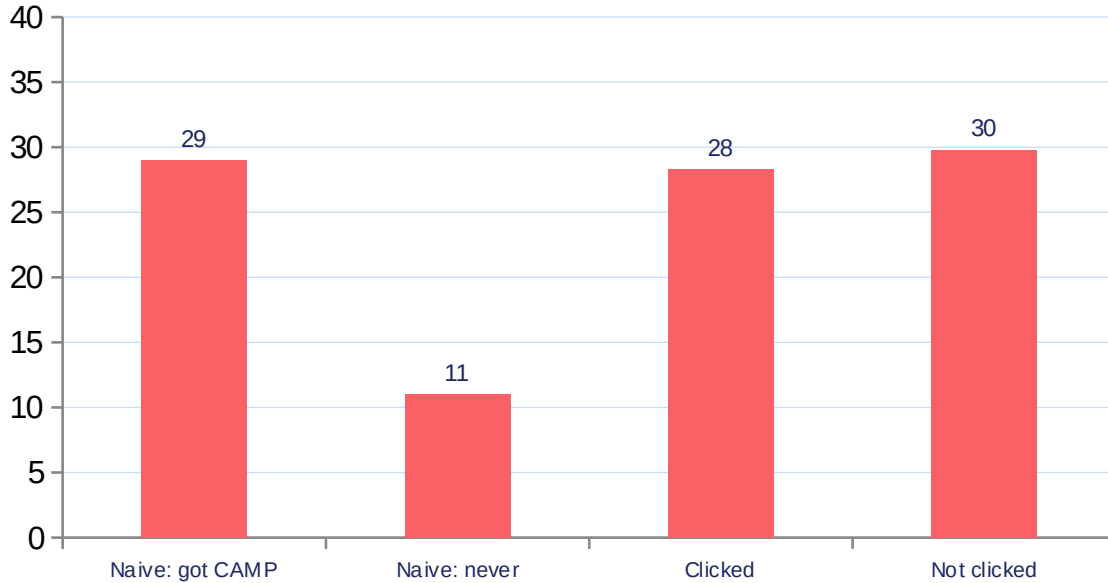

₹35.4

derived / unpaid night-suburban leg — not 30% of fare (₹105)

WHAT NOT TO DO

0 pp campaign lift. Do not bank the field gap.

CAMP_WA_002 — naive vs honest

Clicked vs not (delivered): -1.5pp , CI $[-3.6, +0.6]$ $\rightarrow 0\text{ pp}$. The 29% vs 11% gap is targeting after RC. Do not scale 5 $\times$.

Do not add these to 180

- ▶ Field vs app 128–256/month is selection, not a product lift.
- ▶ 726 C1a captains already sit in that self-serve gap.
- ▶ Never-upload RC $\sim 2,388$ / Insurance $\sim 2,530$ is not another WhatsApp (CAMP was 0 pp).
- ▶ ARA at 30% of fare (₹105) overpays vs ₹35.4.
- ▶ Test: assist RCT on app/paid (~ 900 /arm for a 5pp approval lift).

Ranked by monthly impact. Campaign stop is the fastest yes.

1

C1b camera this week, then C1a RC grace after Legal

~180/mo

Legal on C1a; C1b is engineering

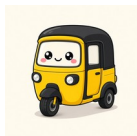

2

ARA ₹35.4 / unpaid night-suburban leg · 4 weeks

₹69–103k sample

Do not hire. Not city-core.

3

Kill CAMP 5×; send/no-send RCT on RC-cleared app/paid

Cost avoided + 4–6 wks

Near zero

This week: ship Insurance UX · scope RC deferral · kill 5× paper · start 4-week ARA at ₹35.4, not 30% of fare.
